

Grease

A premium quality grease will provide protection against four main concerns: Dirt Infiltration, Wash-out, Pound Out and Meltdown. Our greases are specifically formulated to protect against these four major concerns.

We provide a full line of:

Lithium complex, Aluminum complex, Polyurea, Calcium, Moly and Synthetic Greases.

Antifreeze

Ethylene Glycol
Extended Life
Propylene
50/50 Premix
Global
OATS Technology
HOATS
Nitrate Free

Miscellaneous

Open Gear Oil, Bar & Chain Lube, Compressor Oil, Heat Transfer Oil, Penetrating Oil, Mineral Spirits/Parts Washer Fluid, Oil Dry, and Cleaner/Degreaser

Batteries - Interstate and Nationwide Brand Golf Cart Batteries

Light and Heavy Duty
Truck Batteries,
Ground Maintenance
Equipment Batteries, and
Replacement Emergency
Lighting Batteries

Fuels

Gasoline 87, 89, 92
K1 - Kerosene
Diesel - On & Off - Highway
ULSD#2

Fuel Additive

Xtreme Proformance Premium
Diesel Fuel Conditioner

Wireless Remote Monitoring

Benefits:

- 24-Hour Monitoring
- Solar Powered
- Wireless Communication
- 5-10 Minute Installation
- Customizable Threshold Settings
- Reporting Keeps You Informed

Monitoring includes daily reports as well as a report anytime there is activity at the tank. Data is stored and accessed through a secure web portal with your own unique user name and password.

Steel City Lubricants & Supply is a proud Valvoline distributor of commercial industrial products.

Steel City Lubricants is your one source supplier for all your Maintenance Lubricants needs. Gang Mowers, Rotary Mowers, Greens Mowers, Tractors, Backhoe's, Skid loaders and Golf carts are exposed to the most adverse conditions. These conditions include extreme variations in temperatures, moisture conditions due to morning dew, irrigation and rain, not to mention the corrosive nature of fertilizer that is used each and every day.

Steel City Lubricants also looks at the environmental impact of using Lubricants that can be very detrimental to your pristine greens and fairways. By incorporating the use of environmentally friendly biodegradable hydraulic oils and greases we can minimize the impact on these areas. Extreme conditions call for and require the use of severe duty Lubricants. At Steel City Lubricants we provide just that. Our line of specially formulated Xtreme Proformance Lubricants will provide lubrication in the most severe extreme conditions.

Engine Oil

When it comes to course maintenance, all equipment is eventually pushed to the point of overheating. They are running at high rpm's at full load

for hours on end and then at times, left to idle for extended periods of time. These conditions are very detrimental to engine oils. With these conditions in mind, we provide both Synthetic and Non-Synthetic motor oils to overcome these severe conditions.

Engine Oil - we are proud to carry Altra, Valvoline, and Xtreme Proformance brands

Synthetic and Non-Synthetic motor oils Grades: 0W20, 5W20, 5W30, 10W40, 15W40, 2-Cycle

Hydraulic Oil

Hydraulic oil on the golf course as you're well aware can be extremely detrimental to the pristine greens and fairways. The nature of hydraulic systems have inherit problems seals and hose leakage result in thousands of dollars in damage to fairways and greens. The number one solution we suggest is utilizing environmentally friendly biodegradable hydraulic oils to overcome these detrimental conditions. Environmentally friendly biodegradable products lessen the impact on vegetation immediately and can be neutralized with water. We have both **biodegradable** and conventional hydraulic oils depending on your equipment requirements.

Hydraulic Oil - we are proud to carry Altra, Valvoline, and Xtreme Proformance brands

AW32, 46, 68... R&O 32,46,68....Tractor hydraulic, TO-4 Fluids, Biodegradeable

Gear Oil / Transmission Fluid

Gearboxes are found on virtually all ground maintenance equipment. These gearboxes need to perform under the most adverse conditions. Due to the gearboxes operating at extremely high temperatures and high rpm's, they have the inherent ability to take on water due to seal leakage and due to the cooling of the gearbox, internal condensation is formed. Our advanced formulated Gear Oils have the ability to lower operating temperatures and to shed water while still providing an adhesive film strength to protect the internal gears. We provide a premium line of both Conventional and Synthetic Gear Oils in all the recommended grades.

Gear oils / Transmission Fluid - we are proud to carry Altra, Valvoline, and Xtreme Proformance brands

Conventional and Synthetic Gear Oils Grades: 50W, 75W90, 80W90, 85W140

Transmission Fluids

Dexron III, IV, VI / Mercon
Dexron VI, V
ATF+3, ATF+4
Tractor Hydraulic
Universal Multi-Purpose ATF
Synthetic Multi-Vehicle ATF
